- Q/A Session

Tuesday:

- Applications to Forensic Toxicology
- Solve the Case: In-Class Activity
- Present Findings and Report out.

Wednesday:

- Forensic Toxicology (Part #4)
- In-Class Discussion / Q/A

Thursday:

- NCHS -
- Forensic Science classes (Wardisiani) will complete Toxicology Crossword Puzzle

Friday:

- Writing Prompt- Forensic Toxicology
- This is an assignment that will be completed in class. You will have 50 minutes to write 1-page using the criteria I have outlined in class.

Objectives for Week #16

- Explain how alcohol is absorbed in the blood stream, transported throughout the body, and eliminated by oxidation and excretion. // Understand the process by which alcohol is excreted in the breath via the lung. // Understand the concepts of infrared and fuel cell breath-testing devices for alcohol testing. // Describe commonly employed field sobriety tests to assess alcohol impairment. // List and contract laboratory procedures for measuring the concentration of alcohol in the blood. // Relate the precautions to be taken to properly preserve blood to analyze its alcohol content.
- drugs and poisons. // Appreciate the significance of finding a drug in human tissue and organ to assessing impairment.
